Downtown Wadsworth History with Dr. Caesar Carrino

Did You Know?...

In 1905, the start-up telephone company that served about a dozen telephones in Wadsworth and occupied a small office where the bank building is now at College and Main, moved across the street to the Myers Block. The switching equipment took the entire southeast section of the second floor. Today, all the equipment used then to connect one party to another can be contained in a cube about the size of a diamond or an engagement ring.
